

LAS FAASTeam presents:

Fly the Aircraft First and Automated Systems

Patrick Edenfield, helicopter pilot for Channel 3's Tom Hawley morning traffic, will be discussing the necessity of maintaining aircraft control at all times. This may seem our primary function as pilots, but NTSB accident data shows distraction by less essential tasks to be a leading factor to loss of control of aircraft and causal factor in fatal accidents.

Thomas Dowell is a U.S. Air Force UAS (drone) pilot at Creech AFB. He is a launch and recovery instructor for the MQ-9, preparing pilots to deploy and support combat operations around the world. During his free time, Thomas instructs in his Travel Air independently at VGT. Thomas is also a tow pilot at Las Vegas Valley Soaring Association. He will be discussing Loss of Control with/using Automatic Systems.

Directions: Grand Canyon Room in the North Las Vegas Airport Terminal (KVG T)

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
